AMACHEWER

The above officers want to serve you. Contact them for information. Give them your suggestions and most of all your SUPPORT.

We implore your patience, endurance, forbearance, leniency and tolerance. We know less than nothing about editing and publishing this paper or any other paper for that matter. Anyway, here goes with our first attempt and might add probably the last. Meanwhile if you have any suggestions, news items, criticism or contributions you may direct same to The Singer Shack R. R. # 11 Box 185 Indianapolis, Indiana.

To Bob Caskey W9DNQ may be express publically the heartfelt thanks of all the Club members and all other readers for a job well done. After 15 years of struggle with this 'baby' perhaps now that you have retired Bob, you will have for a bit of hamming. (time)

FRIDAY NIGHT CLUB MEETING

This Friday at Club meeting a representative from the Cnetral Coil Co., located in Indianapolis, will be the speaker. An experimental coil kit will be the topic of discussion. See you there.

IRCC

Sunday, April 15th. the radio clubs of Indianapolis were host to the IRCC for the spring meeting at the new Park Board Bldg. Approximately 50 delegates attended. Wayne McCoy W1ICP was present and discussed miscellaneous league activities. There was considerable discussion about the steps to be taken to get the \$5.00 fee for call letter plates reduced. We can all be assured the matter will receive the closest attention at the proper time. It was surprising to learn that the 'worked all counties' contest had only two entries. The radio clubs of Indianapolis were elected to be host to IRCC at the fall meeting.

CENTRAL INDIANA MOBILE RADIO CLUB

The CIMRC is an organization which has grown out of the desire for a planned program of mobile activities in Marion County.

Prior to Dec. 1954 group mobile activities consisted mainly of weekly transmitter hunts attended by about a dozen of the more active mobile operators. On Dec. 12, 1954, W9ZXS Kenny Wise, W9MHP Don Litwiler, W9ATS Jerry Todd, W9FZA John Jones, W9UQW Guy Oakes, W9SVC Hal

Plummer, W9JMD Jack Robertson, W9ZUU Jim Whitmore and W9URT Doc Hunter got together and laid the foundation for the club. The temporary officers were W9UQW president, W9FZW vice president, and W9SVC secretary-treasurer. All members agree the success of the group has been due, in large part, to the work of these temporary officers.

The Auditorium of the Beech Grove Library was chosen as the first meeting place and the first meeting was held there 26 January, 1955.

At this first regular meeting the purposes of the club were outlined:

1. To unite the common interest of the amateur mobile operators in this area.
2. To organize an efficient emergency net.
3. To offer our services to CD, Red Cross or any other organization warranting our services.
4. To organize projects of interest to members.
5. To get acquainted and help each other.

Since this first organization meeting the club has grown to a membership of 50 and at present has 40 active members.

Our monthly schedule is as follows: 1st. Wd. transmitter hunt, 2nd. Wed. is business meeting, 3rd. Wed. transmitter hunt and 4th. Wed. emergency drill.

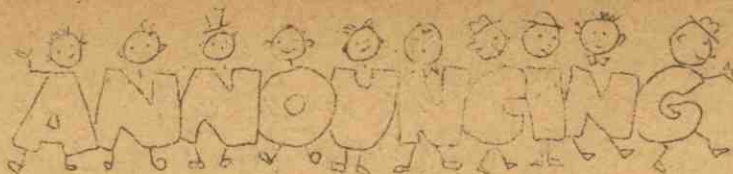

The present officers are W9MHP Don Litwiler, W9IYI John Watt, W9BAQ Bill Thorn. W9ZXS Kenny Wise is activities manager.

Plans for the future is to set up a club station. Since the club is mobile, it will be a mobile station. A small house trailer has been obtained and work will probably start about the middle of summer. Club members are constructing six meter walkie-talkies for emergency work and more emergency drill work is planned.

KC4USA

KC4USA at Anartica is being heard on 14.210 - 14.215 on SSB (upper) working SSB (and the other !) between 12:00 midnight and 6:00A.M. They are 78 degrees south and 180 degrees west. Last week the temperature there averaged 28 degrees below zero, but they expect winter will set in soon. No one can get in or out now until next November. No QSLs till then but well worth waiting for. Other stations will be on later.

W9POF Jerry Bramblett will attend the 3 day ARRL Convention in San Francisco. Date for this convention is July 6th. through July 8th.

SWAP & SHOP

May 25th. is "spring" house cleaning day - the big SWAP & SHOP NIGHT. If you know of a suitable room large enough for the purpose let us know about it. See or phone any of the club officers. WATCH for further details ! ! ! !

There is approximately 500 'HAMS' in Marion County. How many are active and on which band can they be heard is the big question that your EC would like to answer.

SOOOooo the next thing to do is get assistance, where ??? From Assistant ECs and that brings us up to the point in mind, selecting Assistant ECs. If each Radio Club in Marion County will submit the name of their choice for Assistant EC and alternate, we will have a job available getting valuable information. This is a MUST if a disaster should ever arise.

We still have far too few AREC members. Please phone and request a form to fill out.

The State RACES Plan under went a few changes and it should be ready for FCDA and FCC approval very soon. More on that later. 6meter will be the popular band. C U on 6.

DRIVE CAREFULLY

Call-letter license plates bring us a responsibility. Careful driving is wise.

W9DZC Howard 'Grubby' Grubbs has been appointed OBS. Official ARRL Bulletins are read by this station on Monday and Thursday at 1850 on 3910 and also each Sunday at 0850.

Well, OM, did you get in on it? We're talking about the six meter opening we had the other Sunday, April 15th. That's the hottest thing we have seen in a long time. At nine-fifteen our time the band was as dead as the proverbial dodo, so we decided to listen to the net on 3910. For some reason Ron had very little traffic to handle that morning, so at nine-thirty we decided to try again.

Ye Gods, did you set the band switch right? That can't be six meters!!! But it was six meters. In about three hours we logged the following stations in the W1, W2, W3, and W4 areas: W1BOM, BWJ, CEZ, POF, HOY, YDM, YLP, KHM, KHL, HBU, OBQ, FTX, SUZ, UNB,; W2AEW, IHM, QVH, JGV, BYM, RJV, FBZ, RUF, NPY, MON, JTE, K2OAL, AXQ, ATG, IRX, RRB, JFE, MPD, BDF,; W3ZTL, SXD, YPT, ZSN, MPT, HPY, ZHF, FKS, TOM, DMS, AWA, ZZR, YQD, RZD, KMV, FSR, PMJ, OTC, BCF.

The W4 that we heard wasn't identified, as that was one of the first stations that we heard at the beginning of the melee. Buck fever, you know.

We know the following local six meter enthusiasts had themselves a field day: K9CBY, W9HPV (mobile), W9MHP, W9CKD, W9YIL, W9HKK, W9PFR and W9MFH. We heard them make some of their contacts. We know one fellow who added three states toward his WAS. Good luck, OM.

It sure was a great experience and we sure are hoping to be in shape to take

VHF
(continued)

better advantage of the next opening. How about you ?

Well, you fellows that tell us that you are having a lot of good contacts on two meters are being neglected but goo this time. But please forgive us. We will try to get an exclusive for you soon.

There is one VFH band that we haven't been able to get anyone to admit using and that is 220 mc. Are any of you guys crazy enough to try working up in a region where circuitry begins to become a plumbing project ? We would like to know about it if you are and would like to work up a column on your results and experiences if you will share them.

We know of one club that is conducting a club construction project and we are hoping to visit them soon with an eye to doing an article on the project.

One more thing....all you six meter men know that Field Day is coming up.

How about planning on coming out and helping us run up some points for our club showing. There are multipliers for VHF work on low power that ought to make it very interesting to see what sort of score we can run up in comparison with the low frequency boys.
